

**APPLICATION FOR PERMIT
TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA**

FEB 6 1976

Date of filing in State Engineer's Office.....

Returned to applicant for correction.....

Corrected application filed.....

Map filed..... FEB 6 1976

The applicant The Cities of Reno and Sparks
8500 Kimlick Lane, of Reno,
Street and No. or P.O. Box No. City or Town
Nevada 89502, hereby make application for permission to appropriate the public
State and Zip Code No.

waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

The treatment plant is owned jointly by the Cities of Reno and Sparks, political subdivisions of the State of Nevada.

1. The source of the proposed appropriation is effluent from the Cities of
Name of stream, lake or other source.
Reno and Sparks.

2. The amount of water applied for is 27.86 second-feet
One second-foot equals 448.83 gals. per min.

(a) If stored in reservoir give number of acre-feet approximately 55.24 acre-feet acre-feet
per day.

3. The water to be used for Refer to Secondary Permits
Irrigation, power, mining, manufacturing, domestic, or other use.

4. If use is for:

(a) Irrigation (state number of acres to be irrigated).....

(b) Stockwater (state number and kinds of animals to be watered).....

(c) Other use (describe fully under "No. 12. Remarks").....

(d) Power:

(1) Horsepower developed.....

(2) Point of return of water to stream.....

5. The water is to be diverted from its source at the following point: within the NW¼ NE¼ of
Section 14, Township 19 North, Range 20 East, at a point from
which the NE Corner of said section bears N 73° 38' 33" W. E.
Describe as being within a 40-acre subdivision of public survey, and by course and distance to a section corner. If on unsurveyed land,
2311.56 feet. by R. delipkau phone
it should be stated. call 2/26/76 John L.

6. Place of use - Unknown at this date, as Applicants have not yet
Describe by legal subdivision, if on unsurveyed land it should be so stated.
entered into an Agreement or Contract with Applicants for a
Secondary Permit as required by NRS 533.440, subsection (2).

7. Use will begin about January 1 and end about December 31, of each year.
Day and Month Day and Month

8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and specifications of your diversion or storage works.) Effluent is delivered to the
treatment plant where it is treated by chemical and aeration pro-
State manner in which water is to be diverted, whether by dam or other works, whether through pipes, ditches, flumes, or other conduits.
cesses. It is then discharged into the Truckee River via the
Steamboat Canal.

9. Estimated cost of works..... 4.8 million dollars.....
10. Estimated time required to construct works..... -- Completed.....
11. Estimated time required to complete the application to beneficial use..... -- as set forth in the Secondary Permits.....
12. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.

The purpose of this Application is to acquire a primary Permit pursuant to Subsection 3 of NRS 533.440. The storage reservoir is the existing treatment plant, with a capacity of 9.7748×10^6

gallons. Applicants intend to enter into Agreements or Contracts with Applicant(s) for Secondary Permits.

OF STATE ENGINEER

APPROVAL

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued under the authority of NRS 533.440 and is only a temporary allowance and the quantity granted may not exceed the effluent available for discharge. Secondary Applications are required for the use of the surface and groundwater components of the appropriated effluent. The surface water and groundwater component will be administered separately and will be subject to specific requirements under each secondary permit consistent with the agreement dated May 31, 1994 which was entered as Exhibit 89 at the hearing held in May and June 1994. The groundwater component consists of 6700 acre-feet of effluent of the Truckee Meadows Water Reclamation Facility. The surface water component equals the remaining portion of this permit in the amount of 13,470 acre-feet annually. The final water right obtained will be dependent upon the amount of effluent actually placed to beneficial use under the secondary permits. A totalizing meter must be installed at the discharge near the point of diversion and accurate measurements must be kept of effluent discharged. Granting of this permit is not intended in any way to waive or affect authority or requirements. This permit is further issued subject to the provisions of NRS 533.395 and the State retains the right to regulate the use of water herein granted at any and all times.

Prior to any secondary application being issued, an application to change must be filed to show the disposition of any water rights for which the surface water components of the effluent is being substituted.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed..... 27.86..... cubic feet per second.....

Actual construction work shall begin on or before.....

Proof of commencement of work shall be filed before.....

Work must be prosecuted with reasonable diligence and be completed on or before..... February 15, 1997.....

Proof of completion of work shall be filed before..... March 15, 1997.....

Application of water to beneficial use shall be made on or before..... N/A.....

Proof of the application of water to beneficial use shall be filed on or before..... N/A.....

Map in support of proof of beneficial use shall be filed on or before..... N/A.....
